Subject: upcoming increase by SCE & G

Rather than waste the money on a stamp please pass this along to the appropriate individual(s).
I am a retired state employee living on a pension and social security. There was no cost of living increase with either of these agencies this year. Why are the executives of SCE&G giving themselves generous bonuses while asking the rest of us to watch our bills increase another 9%. I, like many other citizens, am outraged at the audacity of such a proposal. My water bill is going up 9%. The company cites the fact that customers used less water by cutting down on individual usage. Now does that make sense?

What is the end point here? Do seniors need to choose between food, medicine and now their utilities?
